About me

Geek, artist, and experienced Fullstack Developer with a passion for technology, specializing in modernizing legacy code, optimizing performance, and improving user experiences. Strong expertise in system design, team coordination, and DevOps.

Work Experience

Senior Fullstack Developer

Hoy Milonga

September 2019 - Present

- Workflow improvement, standardization, and modernization: Implemented Git and management tools for faster iterations and modern development standards.
- Legacy code migration and documentation: Successfully transitioned from AngularJS and PHP systems to the latest technologies.
- Performance debugging and optimization: Achieved a 60% improvement in Google Lighthouse performance scores, with up to a 90% reduction in client bundle size.
- Seek UI and UX improvements. Enhanced site discoverability by 100% of the web client.
- Team coordination and planning
- Utilized SQL databases and Excel.

Lead Frontend Developer

Handit, Switzerland

November 2020 - March 2022

- Team leader for a React Web application: Designed, standardized, and managed a project with rapidly changing requirements following agile development processes.
- Communication with a PHP server using Web Sockets.

Junior Frontend Developer

Mutualitics, Berlin

June - October 2020

- Data visualization with D3 embedded in a React application. Utilized GraphQL and Neo4J graph database.

Mobile Developer

NextDots, Argentina

January - June 2020

- Data visualization with D3 embedded in a React application. Utilized GraphQL and Neo4J graph database.
